

lab:present

Prospective scientists and artists present interdisciplinary research

lab:present allows students of TU Berlin and UdK Berlin to present to a wide audience projects and assignments, which have been developed in the course of their studies. A range of interesting student projects are carried out in connection with their studies but unfortunately stay hidden within the framework of the university – in practical courses and seminars – and do not exceed the concept of beginners' exercises. lab:present recognizes great potential in these projects and supports aspiring scientists and artists to present their work in its full and enhanced form to a wide public.

The lab:present project allows students to show their works, lab results, study results and calculations in public situations. Students can assess both their own work and the work of others and have the possibility to try out different methods of presentation.

Project type

Teaching

Status

Active

Term

January – December 2017

Funding

TU internal strategic funding

Project partners from the TU Berlin

Chemical Institute

Project partners

Project Laboratory Physics TU Berlin

3d-repaircafe TU Berlin

Online Project Laboratory Chemistry of the TU Berlin

Faculty for Materials Science

Eine Einrichtung der
UDK Berlin & TU Berlin

Universität der Künste Berlin
